

Delta Bravo AI

Partner Overview: Industry 4.0 Technology

Delta Bravo is an integration-first solution, designed to seamlessly fit into larger technical architectures to ensure cost-effective scalability. For companies utilizing Microsoft or AWS for cloud infrastructure, Delta Bravo integrates with these systems quickly and efficiently, maximizing the value of their cloud investment. The platform also aligns closely with Cisco Systems, offering integration capabilities with solutions like Edge Intelligence, Industrial Asset Vision, Cybervision, and more.

Delta Bravo Services

DELTA BRAVO PLATFORM

Centralized data platform to ingest, transform and model data from various manufacturing sources. Enables advanced analytics, predictive modeling, and AI deployment.

DELTA APPS

Customizable data collection apps that digitize manual processes, improving data quality and providing process visibility through dashboards and reports.

ADVANCED ANALYTICS

Multi-variate correlation and trend analysis across processes using data engineering (ETL) to identify root causes impacting target outcomes.

DELTA BRAVO

Delta Bravo encourages customers to think bigger about their technical architectures and take full advantage of partner alignment programs. Delta Bravo Copilots are AI-powered applications that assist front-line operators in making data-driven decisions during manufacturing processes, helping to improve quality, reduce waste and downtime, and enhance operational margins.

PREDICTIVE MODELING

Development, training, and tuning of predictive models for specific use cases like quality prediction or scrap reduction.

ONBOARDING SERVICES

Expert data science team to develop, deploy and support customer AI/analytics solutions through the Delta Bravo platform.

ONGOING SOLUTION SUPPORT

Continuous model retraining, data transformation management, and interface support to sustain deployed AI solutions.

DELTA BRAVO

Delta Bravo is one of only 13 Cisco DSI partners worldwide. Customers aiming to modernize and expand their Cisco infrastructure as they transition to Smart Factory operations are often eligible for funding that can help offset Delta Bravo's onboarding and license fees. Similar benefits are also available through other partners, including AWS, Microsoft, and others.
