

## *Partner Overview: Industry 4.0 Technology*

Peer Robotics is transforming manufacturing by leveraging robotic innovation to reduce the physical demands on workers and bring future-forward capabilities to today's manufacturing environments. The company's vision is to create a workspace where robots and humans collaborate

seamlessly, allowing robotic technology to handle repetitive tasks so that human talent can focus on innovation and problem-solving. Peer Robotics' technology is unlocking new levels of manufacturing efficiency and creativity, enabling human potential to thrive.

### **COLLABORATIVE ROBOTIC SOLUTIONS**

Peer Robotics provides mobile robots that automate the movement of materials in manufacturing settings. These collaborative robots learn from human actions in real time, allowing employees on the shop floor to easily integrate and deploy them. With a focus on customization, Peer Robotics ensures that its robotics solutions meet specific client needs, integrating smoothly within existing manufacturing operations.

## PEER ROBOTICS *Client Commitment*

Peer Robotics prioritizes long-term partnerships with clients through annual servicing, software upgrades, and preventative maintenance. This commitment to service ensures that clients experience maximum performance and minimal downtime, while benefiting from the latest advancements in robotic technology.
