# Retina Systems, Inc.

Partner Overview: Industry 4.0 Technology

Located in Seymour, Connecticut, Retina Systems provides custom machines for high volume/high accuracy inspection - utilizing methods of inspection to include vision, laser, eddy current, and sensor. Retina Systems develops and creates custom reports, with paramenters that include work orders, operators, lot numbers cycle times and downtime with reason, allowing our customers to improve their processes. With decades of experience providing critical inspection of various parts and devices spanning multiple industries.

"Quite simply, we are in the business of helping our customers build trust and keep operational promises to gain a competitive advantage."

Retina Systems proves this by providing automated turnkey inspection systems and applications that will deliver "Zero Defect" part inspection for defined attributes and real-time information to ensure quality assurance, reduce scrap, and no returned shipments.
